

## Migration Highlights ◆ Third Quarter 2007

During the third quarter of 2007 the population of British Columbia grew by an estimated 22,765 persons, resulting in an October 1st, 2007 total population of 4,402,931. This growth in population was due to gains from other parts of Canada and the world, as well as an excess of births over deaths.

B.C.'s population grew at a rate of 1.5 percent between October 1st of 2006 and 2007, third only to Alberta's 2.3 percent and Saskatchewan's jump to 1.5 percent. All other provinces and territories had growth rates below the national average of 1.0 percent.

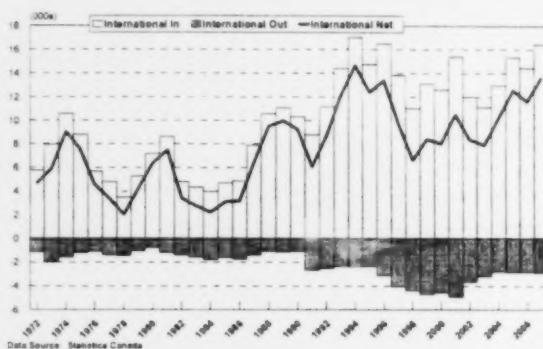

**Fig 1: Interprovincial Migration 3rd Quarter**

During the third quarter of 2007, B.C. gained 22,203 and lost 17,114 inter-provincial migrants, resulting in the highest net inter-provincial movement of all regions, at 5,089. The largest numbers of immigrants arrived from Alberta (11,390) and Ontario (544). The largest losses in population from inter-provincial movement were in Quebec (-3,546), Alberta (-3,316) and Ontario (-3,133). Alberta, still with the highest year over year growth rate of the provinces, gained the most population from other provinces and territories (29,374) but also had the largest loss to them (32,690). The only regions where B.C.

lost population during the third quarter was to Saskatchewan (300) and the Atlantic provinces (254).

**Fig 2: International Migration 3rd Quarter**

Net international migration continued as the main contributor to B.C.'s population growth over the July 1, 2007 to October 1, 2007 period. A total of 13,566 net international migrants were added to B.C.'s population over this quarter. The number of immigrant arrivals, 12,172 persons, rose to 17.0 per cent of Canada's total arrivals in the quarter.

Natural increase (the excess of births over deaths) added 4,020 persons to the population. Deaths, as the baby boom ages into the higher mortality age groups, continued to trend up, at 7,490. Third quarter births (11,510) were the highest since 1996.

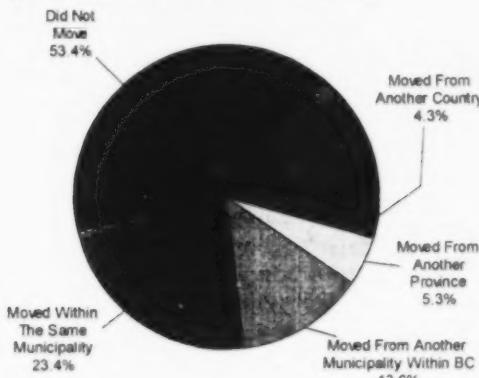

### Population Change Third Quarter 2007

Population: July 1, 2007	4,380,256
Plus Interprovincial Arrivals	22,203
Minus Interprovincial Departures	-17,114
Plus Immigrants	12,172
Minus Total Net Emigrants	-2,872
Plus Net Non-Permanent Residents	4,266
Plus Births	11,510
Minus Deaths	-7,490
<b>Population October 1, 2007</b>	<b>4,402,931</b>

## Mobility and Migration: Census 2006

The results from the 2006 Census show that over 1.8 million people residing in British Columbia on May 16, 2006 lived at a different address five years previously, in 2001. This represents 47% of the population, up from the 46% who moved between 1996 and 2001. (Note that all statistics reported here are for population aged five years old and over.)

Figure 1: BC Mobility 2001 to 2006

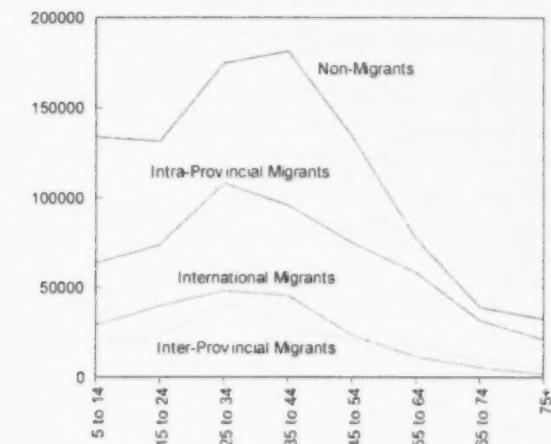

Of the BC residents who did move between 2001 and 2006, approximately 50% moved within the same municipality, 29% moved to a different municipality within the province, 9% moved in from another province, and nearly 12% arrived from a different country. This pattern is practically unchanged from the 1996 to 2001 period.

Table 1: BC 5 Year Mobility Status

Mobility Status	# of People	% of Total	% of Movers
Population 5+ years old	3,871,915	-	-
Non-Movers (Did Not Move)	2,067,785	53.4	-
Non-Migrants (Moved Within The Same Municipality)	904,705	23.4	50.1
Intraprovincial Migrants (Moved From Another Municipality Within BC)	528,500	13.6	29.3
Interprovincial Migrants (Moved From Another Province)	164,715	4.3	9.1
International Migrants (Moved From Another Country)	206,215	5.3	11.4

In general, young adults tend to move more often than people in other age groups, with seniors moving the least. The motivation for moving may also be different among the age groups. For example, 15-24 year olds are often moving away from their parents, in search of education or employment, and individuals aged 25-34 often move to start families.

Figure 2: Movers by Age Group

The most mobile age group in BC were those 25 to 34. Nearly 75% of this group moved at some point between 2001 and 2006, whereas only about a quarter of those older than 75 moved. Additionally, the distance younger people move is somewhat greater, with about 8% of movers aged

Table 2: 5 Year Mobility by Age Group

Mobility Status	Total	5-14	15-24	25-34	35-44	45-54	55-64	65-74	75+

External	6,640	850	1,580	1,590	860	780	660	230	90
Percentage of age group who move		50.5%	54.9%	52.1%	76.9%	56.5%	40.2%	39.3%	27.1%

25 to 34 coming from a different province, compared with only 2% of movers 75 years or older. Indeed, the majority of movers in BC are non-migrants. A non-migrant is defined as a person who had a change of address between 2001 and 2006, but still lived in the same census subdivision (CSD) as they did five years earlier.

Following the net migrant outflow to other provinces of more than 23,000 people in the 1996 to 2001 period, BC returned to a net migrant inflow of about 22,000 people from the rest of Canada in the 2006 Census. Among the other provinces, only Alberta had higher net interprovincial migration, with 88,000 new

residents. Prince Edward Island also had a net inflow of migrants from the rest of Canada. All other provinces experienced a net outflow of migrants, with Ontario and Saskatchewan both losing over 25,000 people, and about 20,000 leaving Manitoba.

Of the 164,710 people to move to BC, most came from Alberta (38.1%) and Ontario (34.0%). Together, these two provinces provided nearly 120,000 new residents to BC. Over 10,000 people also arrived from each province of Manitoba, Saskatchewan, and Quebec.

Of the 206,215 people who moved to BC from

outside of Canada during the 2001-2006 period, over 80% settled in the Vancouver Census Metropolitan Area, representing over 8% of the population aged 5 and over. Victoria and Abbotsford were the second most popular destinations for external migrants, receiving 10,675 and 6,640 individuals, respectively. Vancouver was also the most popular destination among interprovincial movers, accounting for 36.8% of BC's intake,

followed by Victoria (12.0%) and Kelowna (7.6%).

For people moving within the province (both non-migrant and intraprovincial movers), Vancouver was again the most popular destination, taking in more than 720,000 migrants, constituting 50.4% of BC's total. Other areas with a large share of movers coming from within BC include Victoria (115,520), Abbotsford (62,695) and Kelowna (62,395).

Williams Lake	17,605	10,000	4,070	2,770	610	155
British Columbia	3,871,915	2,067,785	904,705	528,500	164,715	206,215

Movers from within the province made up over a third of the population in most of the census areas. Chilliwack and Fort St. John had the largest proportion of these movers, representing 44.3% of both areas' population. At the low end, Kitimat (28.8%) and Powell River (32.3%) were the only areas to have less than one third of their population comprised of intraprovincial movers.

Only five Census Agglomerations had more movers than non-movers in the 2001 to 2006 interval: Fort St. John (45.3%), Kelowna (48.9%), Nanaimo (49.2%), Dawson Creek (49.3%), and Abbotsford (49.5%). However, it should be noted that these areas also had among the high-

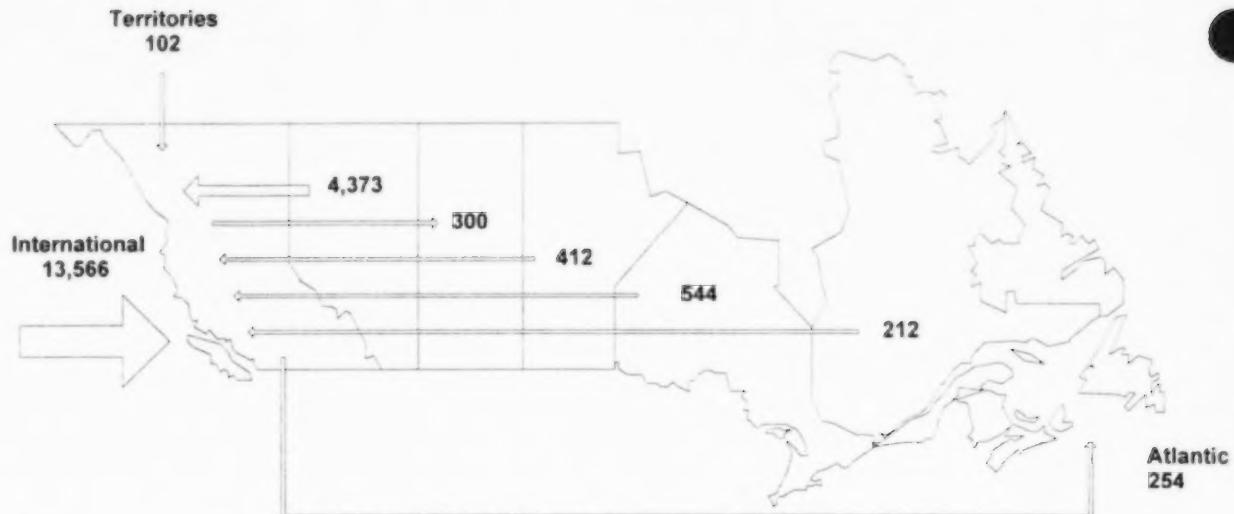

est levels on non-migration moves, indicating that many of the moves were short distance.

The three Census Agglomerations that had the most people with the same address in 2006 as in 2001 were Kitimat (68.1%), Quesnel (64.0%), and Terrace (61.5%). However, as this statistic ignores the number of people who have moved out of the area since 2001, it should not be interpreted as a reliable measure of overall stability. Sub-provincial out-migration figures have not been released to date. As these areas experienced population declines between 2001 and 2006, it is likely that they had a considerable amount of out-migration.
